

Overview

Video Editing

- You should already know that video means the recording, reproducing and broadcasting of visual images (often accompanied by audio).
- Video is made up of a sequence of images shown in quick succession, giving the impression of movement.
- Many different devices can be used to record, edit and playback video and sound.
- Theme, setting, characters, colour, sound, and dialogue are all important features of video.

Editing Videos

Windows Movie Maker is one example of a video editing tool, but many others are available. Examples include WeVideo, Nero Video, and Apple iMovie.

In order to edit your video, you first need to import it from your device to the computer. You then need to import it into Movie Maker by clicking 'Add videos and photos.'

By right-clicking on the video thumbnail, you can choose to 'split' the video into pieces. The different pieces can be moved or deleted.

The trim tool allows you to move excess video from the beginning or the end.

A number of special effects are available, including using animations and transitions between shots. You can also add text in captions.

Remember to save your project regularly. You need to save your project as a *.wmv file so that you can continue to edit it.

Features of Videos

Videos present moving images, often accompanied by sound. The following features are commonly found in videos.

Plot means the main events in the video, shown in a sequence. Plot features are caused by and affect one another.

Common Themes:
courage loyalty
honesty hope
love equality
friendship hard work
forgiveness teamwork

Themes are the main ideas that run through the video, e.g. love, friendship, magic, violence.

Most videos, even very short videos, try to give the audience a message. This may be obvious or hidden.

Props are the moveable objects that are used by the actors/ actresses in videos texts.

Dialogue is the name given for the conversations between people in video texts.

Characters are the different people and animals in a story, including in a video.

Recording Videos

Static Camera: The camera is in a fixed position, sometimes using a stand or tripod. Examples of this in use are during news-reading and weather forecasts.

Zooming: Zooming in means to give a closer view of the subject. Zooming out gives us a further, broader view of the subject. Zooming too close can make the subject appear blurry.

Pan: The camera position is fixed, but moves from side to side.

Tilt: The camera position is fixed, but moves up and down.

Top Tips for Recording High-Quality Videos

- Use considered lighting.
- Think carefully about the sounds that you will use, e.g. music and sound effects.
- Think about the use of colour.
- Consider the use of a green screen for settings.
